May 2012

Profile of General Population and Housing Characteristics: 2010

2010 Census Summary File 2

SUBJECT CONTENT

Summary File 2 (SF 2) contains the data compiled from the questions asked of all people and about every housing unit. SF 2 includes population characteristics, such as sex, age, average household size, household type, and relationship to householder such as nonrelative or child. The file includes housing characteristics, such as tenure (whether a housing unit is owner-occupied or renter-occupied), age of householder, and household size for occupied housing units. Selected aggregates and medians also are provided.

These data are presented in 47 population tables (identified with a "PCT") and 14 housing tables (identified with an "HCT") shown down to the census tract level; and 10 population tables (identified with a "PCO") shown down to the county level, for a total of 71 tables. Each table is iterated for 331 population groups: the total population, 75 race categories, 114 American Indian and Alaska Native categories (reflecting 60 tribal groupings), 47 Asian categories (reflecting 24 Asian groups), 43 Native Hawaiian and Other Pacific Islander categories (reflecting 22 Native Hawaiian and Other Pacific Islander groups) and 51 Hispanic/not Hispanic groups. The presentation of SF 2 tables for any of the 331 population groups is subject to a population threshold of 100 or more people. That is, if there are fewer than 100 people in a specific population group in a specific geographic area, their population and housing characteristics data are not available for that geographic area in SF 2.

GEOGRAPHIC CONTENT

Summary File 2 is released as individual files for each of the 50 states, the District of Columbia, Puerto Rico, and the United States. The tables (matrices) are identical for all files, but the geographic coverage differs.

| Average household size of renter-occupied units | 3.33 | (X) |

X Not applicable.

[1] When a category other than Total Population is selected, all persons in the household are classified by the race, Hispanic or Latino origin, or tribe/tribal grouping of the person.

[2] "Spouse" represents spouse of the householder. It does not reflect all spouses in a household. Responses of "same-sex spouse" were edited during processing to "unmarried partner."

[3] When a category other than Total Population is selected, all persons in the household are classified by the race, Hispanic or Latino origin, or tribe/tribal grouping of the householder.

[4] "Family households" consist of a householder and one or more other people related to the householder by birth, marriage, or adoption. They do not include same-sex married couples even if the marriage was performed in a state issuing marriage certificates for same-sex couples. Same-sex couple households are included in the family households category if there is at least one additional person related to the householder by birth or adoption. Same-sex couple households with no relatives of the householder present are tabulated in nonfamily households. "Nonfamily households" consist of people living alone and households which do not have any members related to the householder.

| Owner-occupied housing units | 16,194 | 43.1 |
| Population in owner-occupied housing units | 54,601 | (X) |
| Average household size of owner-occupied units | 3.37 | (X) |
| Renter-occupied housing units | 21,338 | 56.9 |
| Population in renter-occupied housing units | 68,533 | (X) |
| Average household size of renter-occupied units | 3.21 | (X) |

X Not applicable.

[1] When a category other than Total Population is selected, all persons in the household are classified by the race, Hispanic or Latino origin, or tribe/tribal grouping of the person.

[2] "Spouse" represents spouse of the householder. It does not reflect all spouses in a household. Responses of "same-sex spouse" were edited during processing to "unmarried partner."

[3] When a category other than Total Population is selected, all persons in the household are classified by the race, Hispanic or Latino origin, or tribe/tribal grouping of the householder.

[4] "Family households" consist of a householder and one or more other people related to the householder by birth, marriage, or adoption. They do not include same-sex married couples even if the marriage was performed in a state issuing marriage certificates for same-sex couples. Same-sex couple households are included in the family households category if there is at least one additional person related to the householder by birth or adoption. Same-sex couple households with no relatives of the householder present are tabulated in nonfamily households. "Nonfamily households" consist of people living alone and households which do not have any members related to the householder.
